If your initial deposit(s) were made by Credit/Debit card, any cashout requests will generally be paid back first to your Credit/Debit card up to the amount of deposit(s) in the last 3 months at out discretion. Then, any remaining amounts over your initial card deposit(s) will be subject to the minimum cashout amounts posted in the table above.

So for example, if you were cashing out \$65 and had originally deposited \$50 using a credit card, \$50 would first be credited back to your credit card, and the \$15 left would remain in your real money account since it is less than the \$50 minimum (unless you had a Central Coin account, where the \$15 would be credited to your Central Coin account).

Please note that you do not need to request a withdrawal every time you leave the BugsysClub Poker software. You can leave funds on your BugsysClub Poker account in our secure software and it will automatically be saved for you to play with the next time! The funds are protected with your personal login and password.

If you have any further questions about your account or about the withdrawal methods that are not addressed below, please email us at [Cashier@BugsysClub.com](mailto:Cashier@BugsysClub.com)
